

PROMPT Flex Range

PROMPT Flex Range has become an integral part of many birthing training courses around the world, suitable for all levels of teaching, learning and skill maintenance.

Launched in 2015 the Standard and Advanced units offer closer to life anatomy combined with flexibility to train on routine and a number of difficult birthing management scenarios.

Additional modules which fit either the Standard or the Advanced units allow your training to be tailored to your training needs and include PPH, C-Section and Cervical Dilatation & Effacement.

PROMPT Flex - Standard

80100

Simulated Patient

With improved anatomy, durability and functionality the new PROMPT Flex Standard has a modular design allowing for numerous training scenarios.

Used either for stand-alone training or integrated into hybrid simulation, it is an ideal training solution for all skills relating to routine and difficult deliveries.

PROMPT Flex - Advanced

80106

Simulated Patient

In addition to the functionality of the Standard, the Advanced unit includes both Bluetooth Force Monitoring and Scenario Training.

Traction applied to the baby's head can be recorded during a shoulder dystocia drill, with the force applied visually represented.

The multiple scenario training function allows for monitoring and recording of actions taken during birthing including interventions made and time to deliver the baby. Downloadable PDFs create a record of the trainee's actions and allow for factual debriefing post the scenario.

Product Qualities

Anatomy

- Birth canal and cervix
- Ischial spines and pubic bone
- Gynaecoid pelvis
- Articulating thighs
- IM injecting
- Fully articulated baby with detachable umbilical cord and placenta
- Baby includes clavicles, fontanelles and flexible head

Realism

- Suitable for use with Simulated Patient

Key Features

- Improved and more realistic pelvic floor
- Articulating thighs for McRobert's procedure
- Stretchable perineum
- Soft flexible birthing canal
- Additional modules to extend learning:
 - PPH management
 - C-section
 - Cervical dilation and effacement
- Optional lower legs for extended realism
- Optional wireless force monitoring for training in shoulder dystocia management

Safety

- Latex free

Cleaning & Care

- Skin is washable using soap and water
